

Dusting

Regular light dusting keeps the blind looking clean, and stops any build up of dirt.

Vacuum

Vacuum gently with a soft brush attachment, using a vertical stroke, and taking care not to crease the pleats.

Spot-cleaning

Spot-clean with a soft cloth or sponge moistened with luke warm water. Add mild detergent if needed. Blot gently to avoid creasing or damaging the fabric. Rubbing can damage fabrics.

Notes

- Spot-cleaning may result in cleaner areas than the surrounding.
- Test any cleaning agents on a hidden area of the blind first.
