

General Arrangement Drawing**Features**

- Neat, efficient and robust top cassette containing cloth, roller and all necessary operating mechanism
- Cloth zips into the inner channel and is held secure along its entire length
- Thin two part side guide section, comprising an aluminium outer channel and a uPVC inner channel
- Thin bottom channel guide for the cloth to link into and seal against when blind is drawn
- Standard manual operation by endless loop side chain.
- The innovative cloth guide system allows for narrow and extra long blinds.
- Powered versions available: simple control switch; remote control or automatic system. A 240v AC electric motor with built-in limit switches is fitted within the head box to give simple and trouble free use
